

AMPUP LOAD MANAGEMENT

Optimize and manage your chargers more efficiently while reducing costs by setting your charging load real-time.

Benefits

Avoid disruption

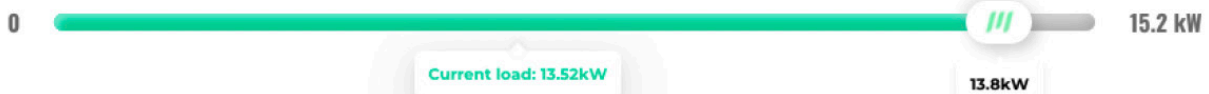

Throttle down ongoing charging load to make sure your facility avoids power disruptions.

Reduce costs

Minimize utility expenses by reducing load at peak times, and maximizing load on off-peak hours.

LOAD CONTROL (kW)

Adjust to balance ongoing electricity load for the **2 EVSEs** in this location

How it works

- 1 Move slider to desired load
- 2 Click save
- 3 See your current load throttle down real-time
- 4 Monitor and manage load as needed
