

# INTELLIGENT EV CHARGING FOR WORKPLACES

Did you know 80% of all EV charging occurs where people work and live? Currently, three-quarters of electric vehicle owners struggle to recharge their EVs at work. Businesses of all kinds must take advantage of the opportunity to develop their charging infrastructure for employees and customers.

## Empower Employees, Retain Customers

87%

Consumers have a more positive image of a company that supports environmental issues.

88%

People are more likely to remain loyal to such a company than a less eco-conscious competitor.

74%

EV owners have a strong interest in workplace charging.

## AMPUP COMMUNITY MANAGER

AmpUp is an electric vehicle (EV) software company delivering stress-free charging solutions to EV drivers, Hosts, and Fleet owners. Designed to cover all your EV charging needs, AmpUp Community Manager (CM) technology provides advanced yet easy-to-use tools for managing multiple EV charging stations and locations, all within one platform. Keep your EV drivers fully charged with AmpUp mobile app.

## Keep Your Employees Charged

- Coordinate charging based on your work schedule with Amp Reservations
- Notifications employees when plugs become available
- Determine access and pricing based on user types, such as employee, fleet, or public
- Advanced reports show charge station usage, revenue, & sustainability metrics

## Revenue Growth & Cost Savings

- Share your charger with the public during off-peak hours to earn additional revenue
- Earn carbon credits to reduce your company's carbon footprint and earn additional revenue
- Utilize Time-of-Use (TOU) pricing adjustments to maximize ROI
- Low cost of electricity versus petrol
